20th Anniversary Symposium

Pediatric Endocrinology and Diabetes

Monday, November 15, 2021 • 8:30am to 12:45pm EST

Live Internet Activity

PROGRAM DESCRIPTION

The past 20 years have seen advancement in the care of youth with diabetes and growth disorders. With this anniversary symposium, the Mount Sinai Division of Pediatric Endocrinology and Diabetes seeks to review the progress in the care of children with diabetes and growth disorders over the last 20 years and looks forward to the upcoming 20 years. Participants will learn about pathophysiology, treatment goals and methods for care of children with diabetes and growth disorders, and will emerge more confident dealing with diabetes and endocrine challenges.

TARGET AUDIENCE

Pediatricians, family practitioners, scientists, nurse practitioners, physician assistants, diabetes educators, nutritionists, dieticians, social workers, residents, students and others involved in the care of young people with diabetes and growth disorders.

GOALS AND OBJECTIVES

At the conclusion of the conference, the participants will be able to:

- Identify the underlying etiologies of growth disorders and understand a systematic approach to genetic testing in the subgroup of patients with apparent genetic causes for short stature.
- Review the underlying etiologies of being born small for gestational age and be able to identify patients that need monitoring.
- Recognize clinical evidence based advances in the treatment of type 1 and type 2 diabetes mellitus.
