GOALS & OBJECTIVES

At the conclusion of the symposium, participants will be able to:

- Identify and analyze new and important studies in medical, surgical/cosmetic dermatology, and dermatopathology.
- Apply the most current research on the diagnosis and treatment of medical dermatological conditions, such as alopecia areata, psoriasis, eczema, actinic keratosis, rosacea, and skin cancer.
- Compare and contrast new surgical techniques, including surgical closures and cosmetic procedures and apply them to their practice.
- Identify new cosmetic agents, including fillers and neurotoxins, and learn injection techniques that can improve patient safety and outcomes.

- Improve skills by observing live patient demonstrations using approved devices for the treatment of photodamage and age-related skin changes.
- Recognize, manage, and appropriately treat unusual skin conditions, including the use of new relevant injectable and IV infusion treatments.
- Assess the various new modalities for evaluating and treating melanoma.
- Demonstrate noninvasive options for fat augmentation via proper dispensing/injecting of the deoxycholic acid.

WHO SHOULD ATTEND?

Dermatologists, cosmetic surgeons, physician assistants, nurse practitioners, residents, fellows, medical students, and other allied health professionals.
