at the Icahn School of Medicine at Mount Sinai

## GENERAL INFORMATION

### **COURSE DESCRIPTION**

The purpose of this meeting is to become familiar with various aspects of transgender surgery. The course will discuss, the surgery itself, the embryological background, the complications, as well as the social and endocrine aspects of transgender surgery. We will learn the difficulties associated with innovations in urogynecologic and gynecologic surgery and understand the most important innovations currently underway. The meeting will update us on pelvic floor disorders, discuss new technology for fecal incontinence and help physicians and healthcare professionals make decisions on which treatment is best for fecal incontinence.

### **PROGRAM OBJECTIVES**

- Review available options for transgender surgery and pelvic floor disorders. Review the techniques and trends in surgery among transgender patients
- Discuss and review the appropriate terms for surgery when providing care for transgender individuals, as well as the social and endocrine aspect of transgender.
- Identify and discuss surgery option for both colon and rectal surgeons and urogynecologists when treating transgender patients, as well as understanding the embryological background and risks with transgender surgery.
- Discuss and Identify the difficulties associated with innovation in Urogynecologic and gynecologic surgery and the most important innovations currently underway.

### **ACCREDITATION**
