Activity Description

This conference will assemble multidisciplinary experts on chronic liver diseases, hepatocellular carcinoma (HCC) and cholangiocarcinoma (CCA) from the Mount Sinai Liver Cancer Program and one outstanding invited lecturer. The meeting is intended to provide a summary of the state-of-the-art knowledge of the novel advancements reported in 2018 on the pathogenesis and clinical management of liver cancer, including the research conducted in Mount Sinai.

Activity Learning Objectives

- Recognize the new trends in the epidemiology of liver cancer and the impact of new anti-viral therapies.
- Review the current surgical and loco-regional treatments for liver cancer.
- Evaluate new molecular targeted therapies approved and in clinical development for HCC and cholangiocarcinoma.
- Describe novel targets and biomarkers for a precision medicine approach of liver cancer.
