5TH NY MASTERS COURSE IN COMPREHENSIVE ENDOCRINE SURGERY

December 12-13, 2019 | Icahn School of Medicine at Mount Sinai, New York, NY

COURSE DESCRIPTION

The purpose of the **5th NY Masters Course in Comprehensive Endocrine Surgery**, to be held on December 12-13, 2019 at the Icahn School of Medicine at Mount Sinai (ISMMS) in New York and sponsored by the Department of Surgery at ISMMS, is to conduct an intensive review of key endocrinology and endocrine surgery topics in a highly interactive setting that will maximize involvement of each participant.

The sessions will cover intensive reviews of key endocrinology and endocrine surgery topics. In addition to basic and controversial topics in thyroid, parathyroid, adrenal, and pancreatic disorders, the sessions will focus on familial and neuroendocrine topics that are relevant to clinicians with an interest in endocrinology and endocrine surgery. Current trends in endocrinology and techniques in minimally invasive surgery will be emphasized. At the end of each session a robust case presentation and panel discussion will take place that will allow for a high degree of dialogue between audience and faculty.

OBJECTIVES

Thyroid and Parathyroid Disorders

1. Discuss current guidelines for treating thyroid cancer including an in-depth discussion of 2015 American Thyroid Association guidelines
2. Recognize trends in the diagnosis and management of hyperparathyroidism
3. Describe novel and minimally invasive approaches to the thyroid and parathyroid glands
4. Demonstrate techniques in minimally invasive surgery through live surgery

Adrenal and Pancreas Disorders

1. Examine how to evaluate incidentally detected pathology
2. Describe the management of functioning tumors to improve the outcomes of surgery
3. Discuss pearls for improving outcome and minimizing surgical complications

Familial and Neuroendocrine Conditions

1. Improve the understanding of the link between cervical and abdominal endocrine pathology in familial conditions
2. Discuss and evaluate 2015 American Thyroid Association (ATA) guidelines for the management of medullary carcinoma

TARGET AUDIENCE

General Surgeons, Endocrine Surgeons, Head and Neck Surgeons, Endocrinologists, Otolaryngologists, Primary Care Physicians, Residents, Fellows, allied health professionals, patients and family members interested in Multiple Endocrine Neoplasia Syndrome.
