## Program Goal

To provide a comprehensive update on the current management and future research directions in liver disease for Gastroenterologists, Hepatologists, Internists, and other Allied Health Professionals involved in the care of patients with liver disease.

## Program Objectives

At the conclusion of this activity, participants should be able to:

- Recognize complications of liver decompensation, including hepatorenal syndrome, hepatic encephalopathy and portal hypertension
- Describe advances in the field of liver diseases presented at major liver meetings in 2019
- Discuss the epidemiology and treatment of NASH
- Summarize updates in the treatment of hepatitis C, hepatitis B and HDV co-infection
- Review evolving modalities of diagnosing fibrosis
- Demonstrate the use of solid organ transplantation, live donor transplantation and transplanting alcoholic liver disease

## Target Audience

This course is specifically designed for Gastroenterologists, Hepatologists, and Internists, Family Practitioners, Nurse Practitioners, PAs, Nurses, House Staff, and Medical Students.

## Accreditation Statement
