Dear Medical Colleagues:

On behalf of the Department of Urology at the Icahn School of Medicine at The Mount Sinai Hospital, I am thrilled to invite you to participate in the Fourth International Prostate Cancer and Urologic Oncology Symposium set for **November 7-9, 2019** in New York City!

This year's program will include over 100 experts including National and International Urologists, Urologic Surgeons, Urologic Oncologists and Mid-Level Providers who will provide in-depth training on cutting-edge medical advances and ground-breaking treatment approaches for prostate, kidney, bladder, and renal cell cancers.

SYMPOSIUM HIGHLIGHTS INCLUDE:

PROSTATE DAY 1

THURSDAY 11/7/19:

- Advanced imaging in genomics for prostate cancer
- Focus on radiomics and radiogenomics
- Utility of imaging and artificial intelligence in prostate cancer treatment
- Targeted biopsy and focal therapy options for prostate cancer
- Urinary incontinence and sexual function post-operative treatment
- Improvements in imaging and targeted therapy for metastatic cancer
- New techniques to improve outcomes for robotic prostatectomy
- Discussion of single port robotic surgery
- Clinical trials in nerve sparing and nerve regeneration after prostate cancer surgeries

PROSTATE DAY 2

FRIDAY 11/8/19:

- Innovations in the management of castrate-sensitive prostate cancer
- Biomarkers and immunotherapy
- Update on clinical trials for castrate-resistant treatments for prostate cancer
- Advances in multi-modal treatments for locally advanced prostate cancer
- 3-D robotic technique for nerve sparing
- Status of bio tech and clinical trials in prostate cancer treatment
- Highlights from ASCO and AUA on metastatic prostate cancer

KIDNEY & BLADDER DAY

SATURDAY 11/9/19:

- New progress in pre-operative and intra-operative imaging, 3-D modelling, and ultra sound guidance for renal tumors
- Novel therapeutics in the management of metastatic renal cell carcinomas: VEGF, TKIs, and immunotherapy
- Genomics and biomarkers for kidney and bladder cancer
- Advances in second line transitional cell carcinoma for bladder and kidney
- Improvement in surgical technique to maximize outcome for kidney and bladder cancer
