## Course Description:

The symposium is designed to provide the most up-to-date science, innovation, and discovery in key areas across women's lifespans, including focuses on menopause, endometriosis, preeclampsia, eating disorders, cardiovascular health, brain health, female-specific cancers, and more. The one-day meeting brings together physicians and scientists, across many disciplines, who are leading the way in advancing women's health research. Together, we will engage in meaningful discussions on these important topic areas that are leading drivers of suboptimal health for women. This symposium will forge a focus on science and care that uniquely impacts women.

## Objectives

To summarize the many disorders that specifically impact women at different points in their lifetime.

To understand the most up-to-date science and innovation for many common female-specific disorders such as preeclampsia, menopause, endometriosis, and female-specific cancers.

To describe the cutting-edge research focused on improving cardiovascular, brain, and overall health for women across their lifespan.

## Accreditation

The Icahn School of Medicine at Mount Sinai is accredited by Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
