## GOALS & OBJECTIVES

At the conclusion of the symposium, participants will be able to:

- Identify and analyze new and important studies in medical, surgical/cosmetic dermatology, and dermatopathology.
  - Apply the most current research on the diagnosis and treatment of medical dermatological conditions, such as psoriasis, eczema, actinic keratosis, rosacea, and skin cancer.
  - Compare and contrast new surgical techniques including surgical closures and cosmetic procedures and apply them to their practice.
  - Identify new cosmetic agents, including fillers and neurotoxins, and learn injection techniques that can improve patient safety and outcomes.
- Improve skills by observing live patient demonstrations using approved devices for the treatment of photodamage and age-related skin changes.
  - Recognize, manage and appropriately treat unusual skin conditions, including the use of new relevant injectable and IV infusion treatment.
  - Assess the various new modalities for evaluating and treating melanoma.
  - Demonstrate noninvasive options for fat augmentation via proper dispensing/injecting of the deoxycholic acid.

## FACULTY DISCLOSURE

It is the policy of Icahn School of Medicine at Mount Sinai (ISMS) to ensure objectivity, balance, independence, transparency, and scientific rigor in all CME-accredited educational activities. All faculty participating in the planning or implementation of an activity accredited by ISMS are expected to disclose all of their financial relationships with ineligible companies existing within the prior 24 months. Relevant financial relationships will be mitigated and disclosed to learners before the activity takes place. Presenters must also make a meaningful disclosure to the audience of their discussions of unlabeled or unapproved drugs or devices. This information will be available as part of the course material.
